codeium

AI for Devs, IT approved

Codeium is a code acceleration toolkit built on cutting edge AI technology, complete with autocomplete, chat, search, analytics and insights.
Let Codeium be a partner through your AI journey.

Features for enterprise customers:

The Entire Software Lifecycle

Codeium is a state of the art AI toolkit for devs, with autocomplete, chat, search, and more on the way.

Unbeatable Security

The most secure SaaS plan + options to self-host in a VPC or on-prem. We meet the security level you need.

Personalized to Your Code

Your code is special. Codeium learns from your existing knowledge to work better for you.

Leading Compliance

We do not train our proprietary models on private or non-permissive code. Legal teams approve.

Universal Developer Support

Codeium supports 70+ languages and 40+ IDEs. We meet developers where they develop.

Realtime Analytics Dashboards

Live metrics and insights on your Codeium usage to justify ROI and increase adoption.

Trusted and Focused Team

A partner focused on your developers that is always building for you and listening to you.

"This is the most productive I've ever been as an engineer in my life."

—Staff Software Engineer, **Fortune 500 Tech Company**
